The Filtration Industry Leader in Quality and Service

Carolina IAQ, a division of Carolina Filters, Inc., has been a trusted and reliable partner to our customers since 1968. For over half a century, we have made thousands of working environments and facilities more comfortable, more energy efficient and healthier for the occupants. We are trusted by our customers to provide a quality filter for their applications.

Family-owned and operated for its entire history, Carolina IAQ provides unmatched customer service and engineered solutions in the filtration industry.

"Our company was founded on finding solutions to filtration problems. Each and every day, Carolina IAQ lives by our original motto: 'Committed to Quality Service.'"

- Coles Dwight, Principal/CEO

Experts in Air Filtration Requirements and Supplies

Our expert technicians are focused on ensuring you have the exact filters you need without long lead times.

Carolina IAQ recently opened a new distribution center in South Carolina to better serve our clients in the Southeastern United States. We maintain a large stock of standard-sized air filters that can be customized to provide specialty sizes with minimal turnaround time. We offer kitting services to package the exact sizes of filters your company needs to replace regularly.

Experts in Liquid Filtration Requirements and Supplies

Carolina IAQ provides the highest quality of products to meet liquid filtration requirements for a variety of industries, from industrial to health care.

To meet the required quality and safety standards in industries such as beverages and electronics, systems must integrate several filtration processes to reduce particulate matter, remove bacteria, viruses and other microorganisms, and protect all equipment. We provide filtration bags, cartridges, carbon filters and other specialty products curated for each industry and company's needs.

Carolina IAQ can provide liquid filtration for a variety of purposes to help many industries, including:

Process water, chemicals, inks, and paints & coatings for Industrial companies

Bottled water and pretreatment reverse osmosis for Food & Beverage companies

High-purity water and plating for the Electronics industry

Process water for dialysis centers and other Health Care providers

Filtration for municipal water treatment plants

Water Purification for Pharmaceutical and Life Sciences

Particle Removal for Oil and Gas

Filter and IAQ Solutions for a Variety of Industries

Carolina IAQ takes pride in being a trusted vendor to multiple markets and businesses that depend on safe, reliable indoor air quality.

Carolina IAQ offers full-service filter ordering, custom creation and distribution from our Southeastern Distribution Center. We work with clients to create, sort, and send the exact filters they need. Our services include cutting, capping, and labeling air filters to create specialty size pleated air filters with a short turnaround time.

Our warehousing and distribution center ensures you have the exact filters you need without long lead times.
